## PROFESSIONAL SUMMARY

Blending over 10 years of teaching experience with a new recognized Level 8 Diploma in Full Stack Development, I bring together a deep understanding of design with fresh tech problem-solving skills. My journey from qualified international educator at top international schools around the world, cultivating a safe and encouraging environment that fosters creative thinking to inspire young and adult learners through innovative design and experiential pedagogy, to diving into coding, has shaped a special skill set where creativity meets functionality in web development. Eager to keep learning, I'm exploring the tech world with a careful designer's eye, aiming for digital experiences that are both top notch and smooth.

## PROFESSIONAL EXPERIENCE

### Full Stack Software Developer (Student)

*Code Institute Ireland | 2023 - Present*

- Completed comprehensive training in full-stack development technologies including HTML, CSS, JavaScript, Python, Django, and React
- Built full-stack applications using Django (backend), ReactJS (frontend), PostgreSQL, and RESTful APIs.
- Developed multiple responsive web applications with focus on user experience and accessibility
- Collaborated with peers on group projects using Agile methodologies
- Participated in and won hackathons, demonstrating problem-solving abilities and teamwork

### Primary International Teacher

*International School of Kazan, Russia | 2024 - 2025*

- Designed and implemented innovative curriculum for international students
- Integrated technology into classroom activities to enhance learning experiences
- Collaborated with international faculty to develop cross-curricular projects
- Mentored new teachers and led professional development workshops

### ICT Secondary Teacher

*Cambridge TAMOS International School, Almaty, Kazakhstan | 2019 - 2022*

- Taught Information and Communication Technology to secondary students following Cambridge curriculum
- Developed and implemented project-based learning experiences focused on real-world applications
- Organized coding clubs and technology competitions to foster student interest in computer science

- Maintained school technology resources and provided technical support to colleagues

## EDUCATION

### Irish Level 8 Diploma in Full Stack Software Development

*Code Institute, Ireland | 2023 - 2025*

### M.Ed in Education Management and Leadership

*Eton University | 2024*

### M.A in TESOL (Teaching English to Speakers of Other Languages)

*Eton University | 2020*

### Postgraduate Certificate in Education

*University of Education | 2023*

### British Level 6 Diploma

*British Education Institute | 2019*

## ACHIEVEMENTS

### 1st Place | Code Institute's Budget Busters: New Year, New Numbers! Hackathon | Jan 2024

Project: Broker Buddy (HTML, CSS, JavaScript, Django, Python)

Primarily focused on frontend development, which included creating wireframes in Figma and coding in HTML, CSS, JavaScript, README, and Bootstrap. Also integrated Django template tags and expressions for dynamic functionality when necessary.

## TECHNICAL SKILLS

**Languages:** HTML, CSS, JavaScript, Python

**Frameworks & Libraries:** Flask, Bootstrap, Django, Django REST, jQuery, React, SASS

**Databases:** PostgreSQL, MongoDB

**Developer Tools:** GitHub, Git, GitHub Co-Pilot, Visual Studio Code, Npm, Pip, Cursor

## METHODOLOGY

Agile Development, Accessibility Standards, Mobile-First Design, Responsive Web Design, User-Centered Design

### Professional Attributes

Creative problem-solver • Strong communicator • Design thinker • Collaborative team player • Attention to accessibility and user experience

*References available on request • Open to relocation and remote opportunities*
